SOLISTICE
RENEWABLE ENERGY

Powering commercial energy independence, one rooftop at a time.

Distributed solar + battery storage delivered as a 20-year PPA, layered with a recurring SaaS energy-management platform.

$10.0M	**$45.0M**	**>65%**	**65**
SERIES A RAISE	POST-MONEY VALUATION	5-YR REVENUE CAGR	SYSTEMS DEPLOYED BY FY30

THE PROBLEM

Commercial energy buyers are stuck between rising costs and a slow, risky grid transition

Volatile utility rates

Commercial & industrial (C&I) customers face utility rate hikes averaging 5-8% a year, with no ceiling in sight.

Capital & permitting drag

On-site solar + storage typically requires $1M+ of upfront capex and 12-18 months of engineering, financing and interconnection work.

No visibility after install

Once systems are live, most owners have no real-time way to monitor performance, dispatch storage, or capture grid-services revenue.

The result: C&I energy buyers overpay for power they don't control, while renewable IPPs struggle to retain customers post-installation.

THE SOLUTION

One contract, two revenue engines: asset-backed PPAs plus recurring SaaS

Turnkey solar + storage

Solistic designs, finances, installs and owns 500kW solar / 1,000kWh battery systems on customer sites – zero capex for the customer.

20-year PPA

Customers buy power below their utility rate under a fixed-escalator Power Purchase Agreement – instant, guaranteed savings.

Solistice OS (SaaS)

A energy-management platform monitors, dispatches and optimizes every system, and upsells into grid-services and demand-response revenue.

WHY IT WORKS FOR CUSTOMERS

$0	Upfront capex for the customer
~15-20%	Typical savings vs. utility rate
40%	Of system cost recovered via ITC direct pay
24/7	Remote monitoring via Solistice OS

BUSINESS MODEL

From site assessment to recurring revenue in four connected steps

01

Site & Design

Engineering team assesses rooftop / ground-mount sites and designs a 500kW solar + 1,000kWh BESS system sized to load.

02

Finance & Build

Capex funded via 60% asset debt, 40% equity/cash, with ~40% recovered through ITC direct pay – customer pays nothing upfront.

03

PPA Go-Live

Customer signs a 20-year PPA at a rate below their utility tariff, with a 2.5% annual escalator built in.

04

Operate & Optimize

Solistice OS monitors generation, dispatches storage, and captures grid-services / demand-response revenue for the life of the asset.

MARKET OPPORTUNITY

A fast-growing, undersupplied market for distributed commercial solar + storage

TAM	**$54B**	U.S. commercial & industrial distributed solar + storage market
SAM	**$9.2B**	Mid-size C&I sites (250kW–2MW) addressable via turnkey PPA + SaaS
SOM	**$410M**	Target sites across Solistice's initial deployment regions, 5-yr horizon

C&I electricity prices climbing 5-8%/yr, widening the savings gap PPAs close.

ITC direct-pay & bonus depreciation under current law materially improve project-level returns.

Corporate decarbonization mandates are pulling C&I buyers toward on-site renewable procurement.

BUSINESS MODEL

Two revenue engines compound together: asset PPAs plus recurring SaaS

PPA Revenue

Generation × escalating contract rate ($0.17/kWh, +2.5%/yr). Long-duration, contracted, ~89% gross margin.

70%
of FY26-30 revenue

Grid Services

Demand response & grid-services fees of $50K/system/yr, layered on top of every deployed asset.

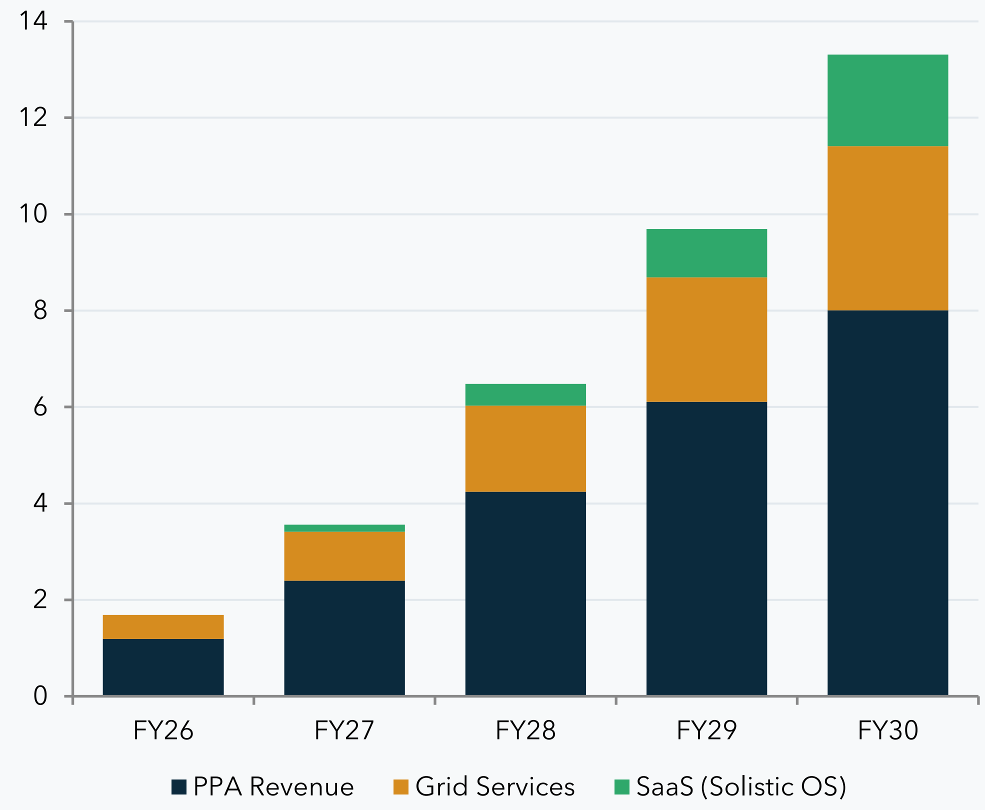
16%
of FY26-30 revenue

SaaS (Solistice OS)

Recurring ARR from the energy-management platform; 75% gross margin, asset-light and highly scalable.

14%
of FY26-30 revenue

REVENUE MIX BY YEAR ($M)



SOLISTICE
RENEWABLE ENERGY

UNIT ECONOMICS

Every system is a self-funding, fully-financed cash-flow asset

PER-SYSTEM SPECIFICATION

Solar capacity	500 kW DC
Battery storage	1,000 kWh
Installed cost (blended)	$1.15M
Year-1 generation	700,000 kWh
Output degradation	0.5% / yr
PPA rate at signing	$0.17 / kWh
PPA price escalator	2.5% / yr
Grid services fee	$50,000 / yr

FINANCING STACK (PER SYSTEM, $1.15M)

Asset debt (60%) — **$690,000**
7.5% fixed, 11-yr tenor

ITC direct pay (40% of eligible basis) — **$460,000**
Cash credit received at commercial operation

Net equity / cash required — **$230,000**
~20% of gross system cost, funded by Solistice

Year-1 system revenue: $169,000 (PPA + grid services) – O&M cost is only 15% of PPA revenue, leaving high-margin, contracted cash flow for 20 years.

TECHNOLOGY & DIFFERENTIATION

Solistice OS turns a static solar asset into an intelligent, revenue-generating one

Real-time performance monitoring

Generation, degradation and battery state-of-charge tracked continuously across the fleet.

Automated storage dispatch

Battery discharge is optimized against grid price signals and demand-response events.

Grid-services marketplace

Aggregates fleet capacity to bid into utility & ISO demand-response programs.

Predictive maintenance

Anomaly detection flags underperforming systems before they impact PPA output.

Customer savings dashboard

Gives every PPA customer a transparent, live view of usage and savings vs. utility rate.

Open integration layer

APIs connect to customer BMS/EMS systems and third-party inverters and meters.

DEPLOYMENT PLAN

A disciplined roll-out: 65 systems and $74.8M of deployed capital by FY2030

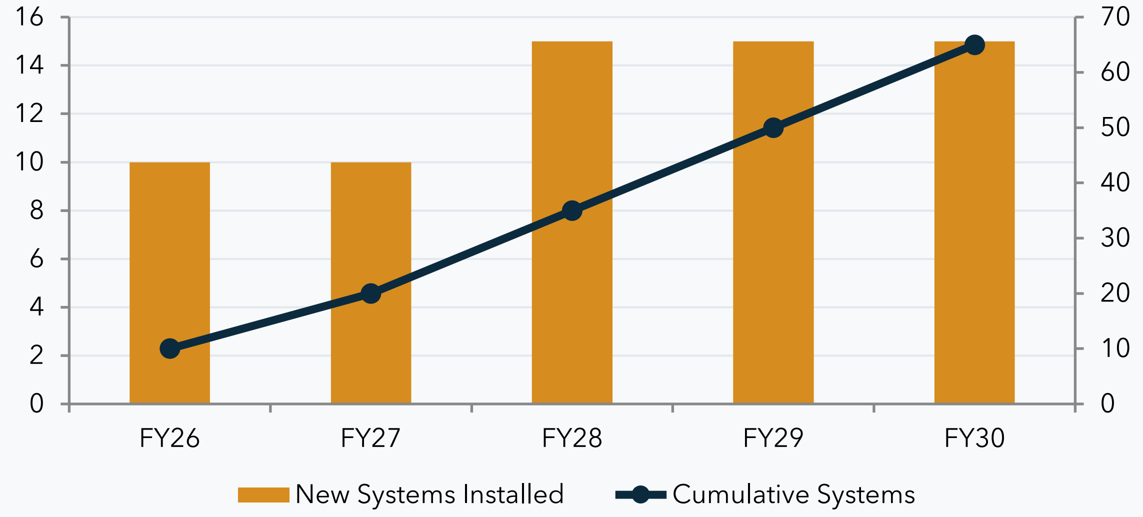
65
SYSTEMS DEPLOYED, CUMULATIVE FY30

$74.8M
CUMULATIVE GROSS CAPEX FY26-30

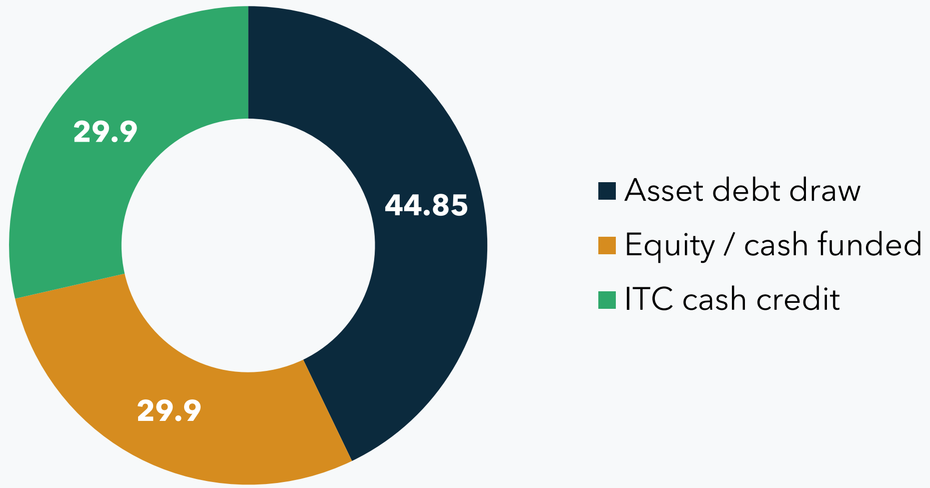
$29.9M
CUMULATIVE ITC CASH CREDIT

32.5MW
CUMULATIVE SOLAR CAPACITY FY30

SYSTEM DEPLOYMENT (NEW vs. CUMULATIVE)



CUMULATIVE CAPEX FUNDING (FY26-30)



GO-TO-MARKET

A focused channel strategy targeting mid-size C&I sites with strong load factors

TARGET CUSTOMER SEGMENTS

Light manufacturing

250kW-2MW average demand, daytime-heavy load profiles

Logistics & warehousing

Large flat rooftops, predictable long-term leases

Multi-site retail & grocery

Portfolio deals across multiple locations with one MSA

ACQUISITION CHANNELS

Direct enterprise sales 45%

Dedicated team targeting regional C&I accounts and portfolio owners

EPC & developer partnerships 30%

Co-development and referral agreements with regional EPCs

Utility & broker referrals 15%

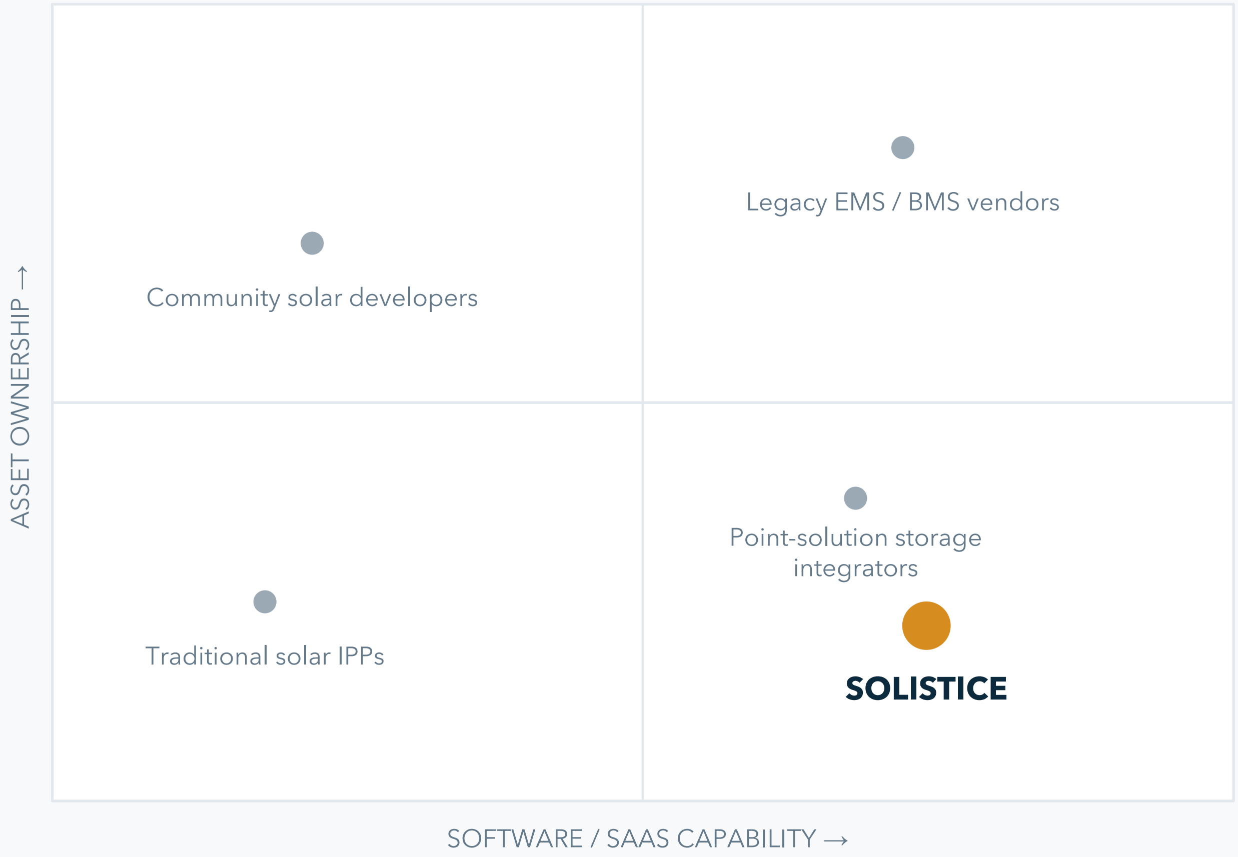
Demand-response aggregators and energy brokers as lead sources

Inbound / digital 10%

Content, case studies and channel marketing

COMPETITIVE LANDSCAPE

Positioned where asset ownership meets software-driven optimization



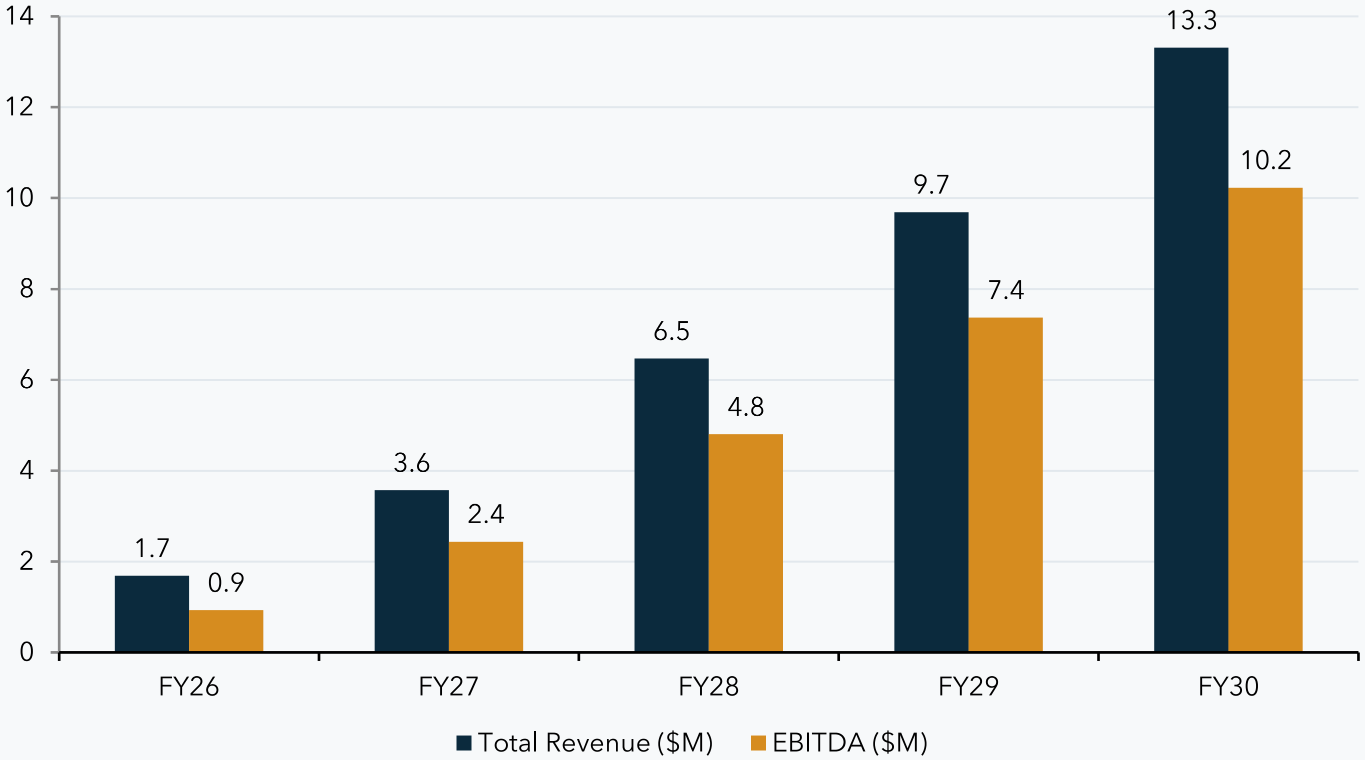
HOW WE COMPARE

	Solistice	SaaS-only	IPP-only
Zero upfront capex for customer	✓	✓	–
Owns & operates hardware asset	✓	–	✓
Integrated SaaS optimization layer	✓	–	–
Recurring grid-services revenue	✓	–	–

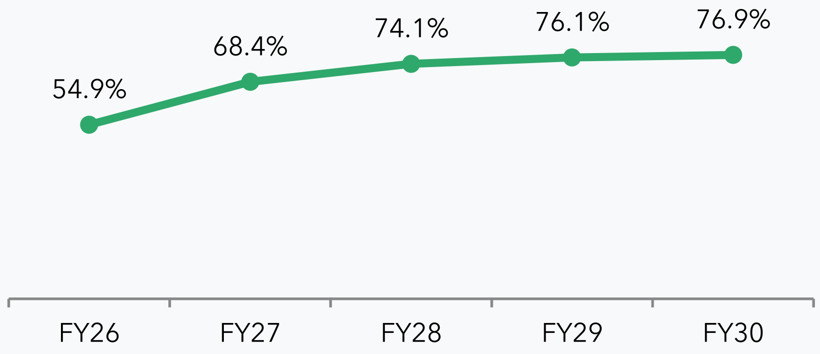
FINANCIAL HIGHLIGHTS

Revenue scales 8x while EBITDA margin expands from 55% to 77%

TOTAL REVENUE & EBITDA ($M)



EBITDA MARGIN TREND



NET INCOME ($M)

$0.05 M	$0.55 M	$1.20 M	$1.59 M	$1.21 M
FY26	FY27	FY28	FY29	FY30

Net income turns positive in FY26 and compounds through FY29 before absorbing FY30 vintage debt service.

FINANCIAL SUMMARY

Five-year consolidated P&L summary

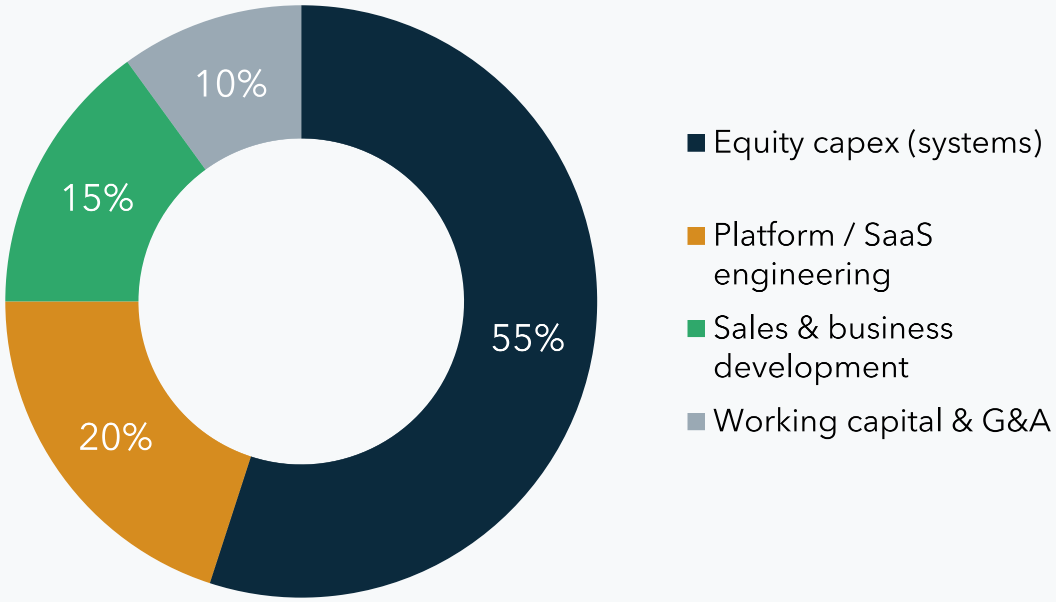
$ in millions unless noted	FY2026	FY2027	FY2028	FY2029	FY2030
Total revenue	1.69	3.57	6.47	9.69	13.31
Gross margin %	89.4%	88.8%	88.4%	88.0%	87.4%
EBITDA	0.93	2.44	4.80	7.37	10.23
EBITDA margin %	54.9%	68.4%	74.1%	76.1%	76.9%
D&A	0.35	0.69	1.21	1.73	2.24
Interest expense	0.52	1.00	1.71	2.37	2.97
Net income	0.05	0.55	1.20	1.59	1.21
Net margin %	2.9%	15.4%	18.6%	16.4%	9.1%
Ending cash balance	11.89	12.12	12.75	13.51	13.57

All figures derived from the Solistice 5-year integrated financial model (Assumptions-driven; FY2026-FY2030 horizon). See Appendix for full 3-statement detail.

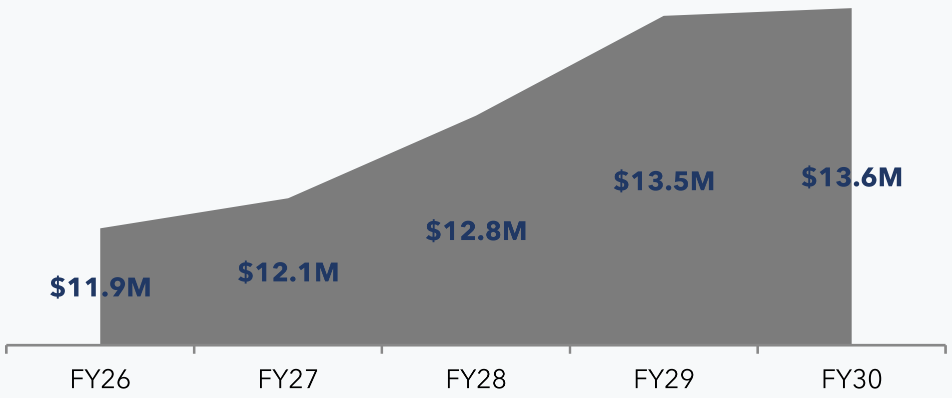
CAPITAL PLAN

The $10M Series A funds equity capex for FY26-27 and scales the platform team

USE OF SERIES A PROCEEDS



PROJECT CAPITAL STACK REMAINS DEBT-EFFICIENT



Cash balance stays above $11.8M throughout the plan, funded by Series A proceeds plus recurring operating cash flow – no additional equity raise required through FY2030 under base-case deployment.

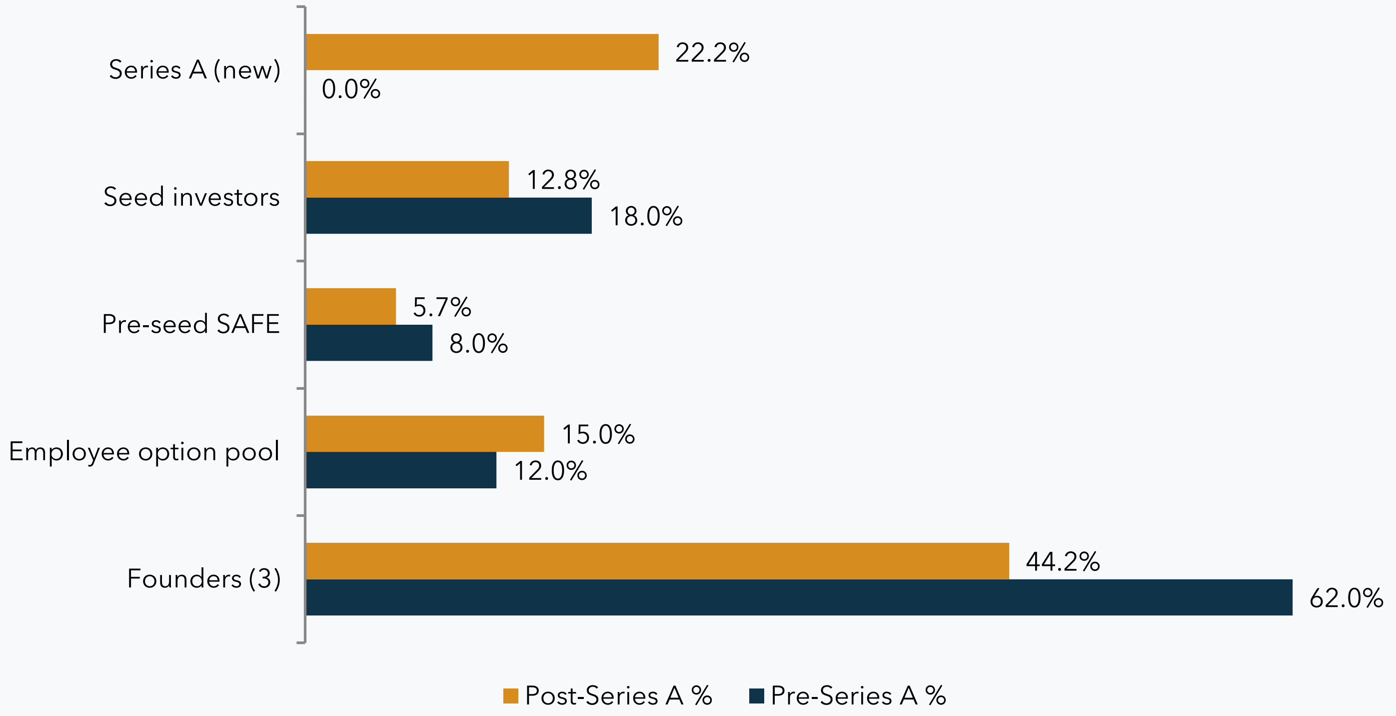
THE ASK

Raising $10.0M Series A at a $45.0M post-money valuation

SERIES A TERMS

Pre-money valuation	**$35.0M**
New investment	**$10.0M**
Post-money valuation	**$45.0M**
New investor ownership	**22.2%**
Refreshed option pool	**15.0% FD**

OWNERSHIP WATERFALL



SOLISTICE
RENEWABLE ENERGY

TEAM

A founding team spanning energy project finance, software and operations

Founder & CEO

15 yrs in project finance & structured energy investing; led $400M+ of distributed generation capital deployment.

Founder & CTO

Former lead engineer on grid-scale battery management systems; built the Solistice OS dispatch engine.

Founder & COO

Ran deployment operations for a national C&I solar installer; scaled crews across 20+ states.

VP, Business Development

Former energy broker; owns the direct-sales and EPC partnership channel.

Backed by an advisory board of former utility executives, tax-equity investors and C&I energy buyers supporting underwriting, financing structure and enterprise sales.

SOLISTICE
RENEWABLE ENERGY

Thank You!

Let's build the distributed grid of the future — together.

We're raising a $10.0M Series A to fund the next 20 systems, scale Solistice OS, and deepen our C&I sales channel.
